# Using Font Awesome plugin

Categories: [Misc](#)

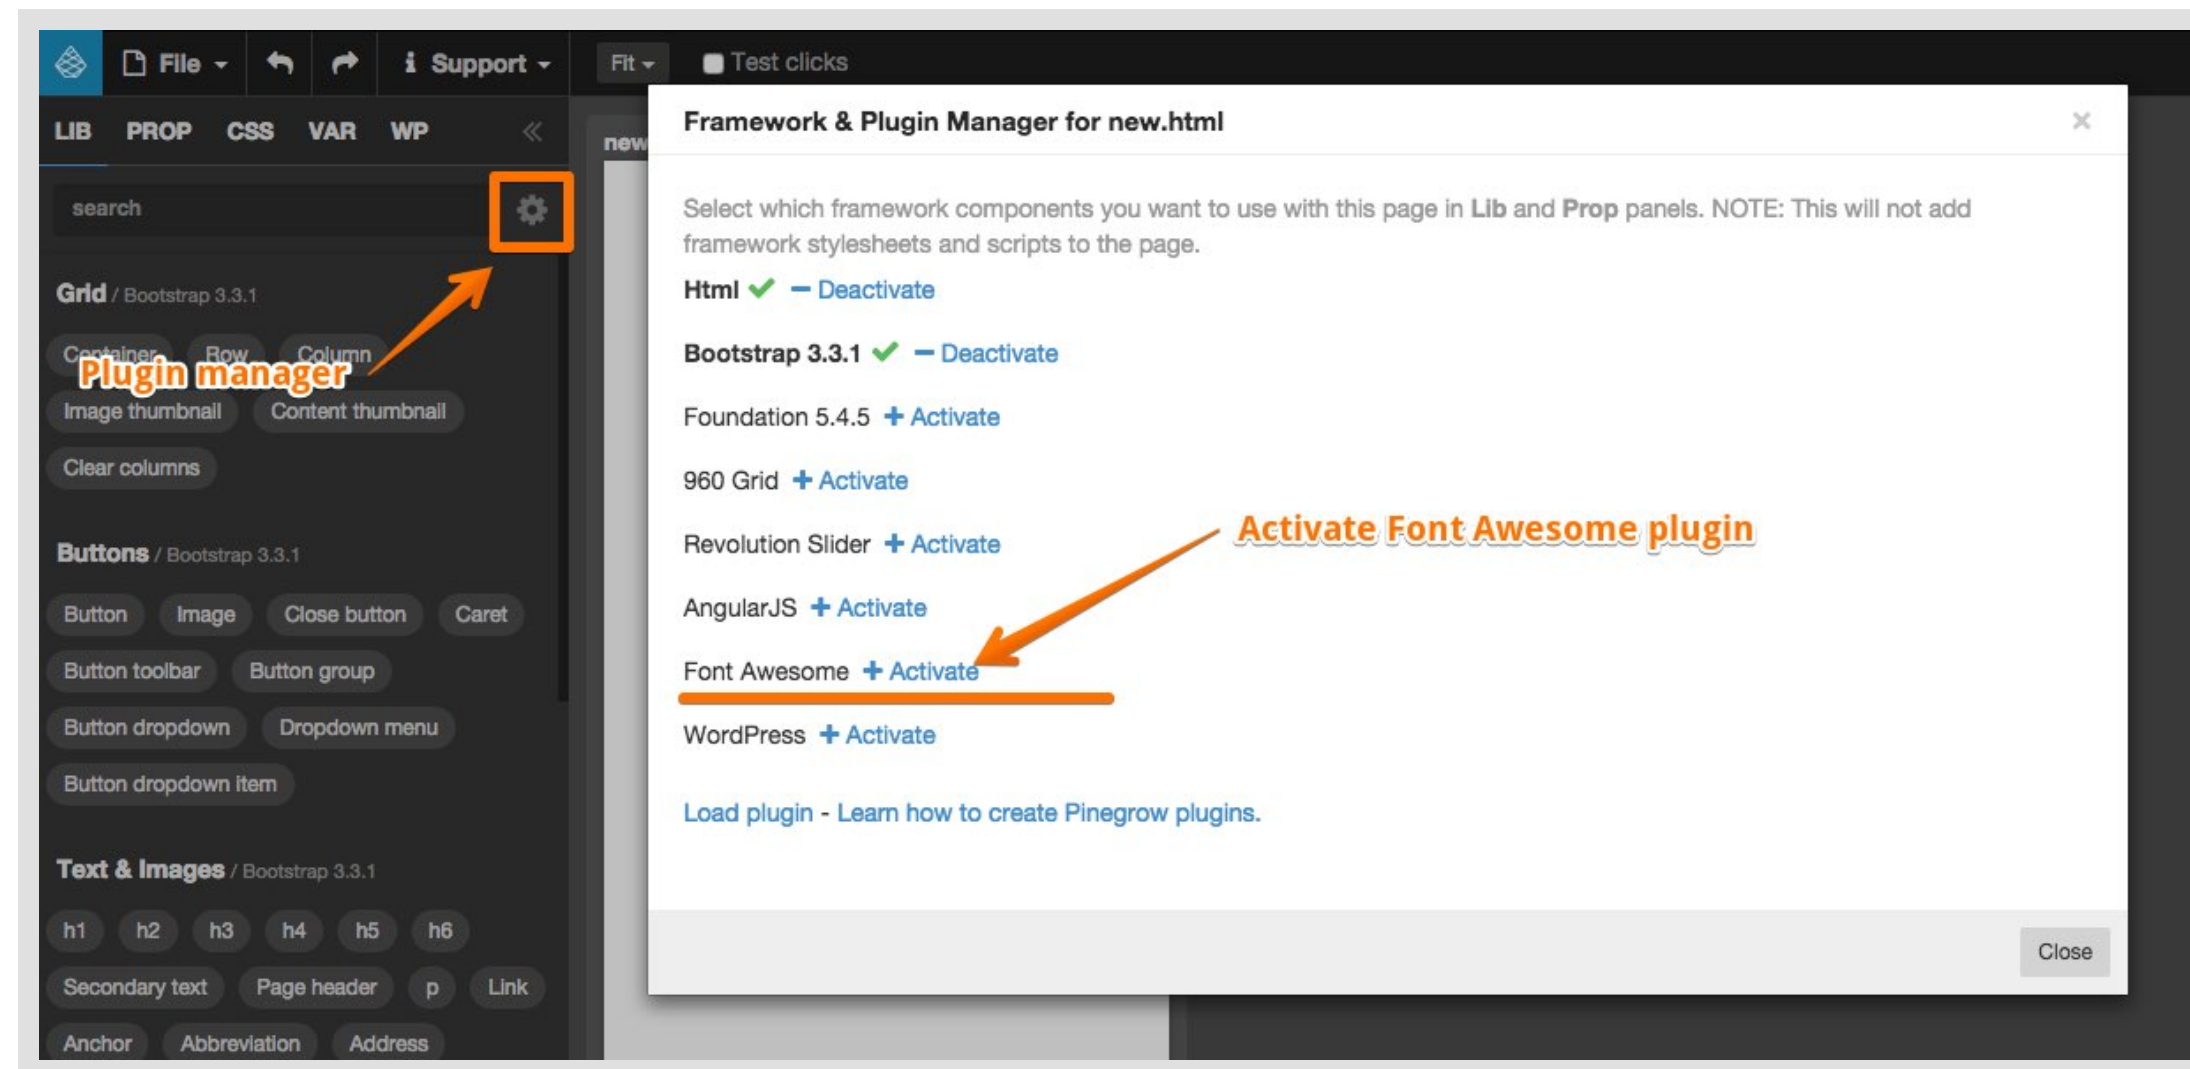

Pinegrow comes with a Font Awesome plugin that lets you easily add icons to the page and edit their properties. It also supports Icon stacks.

## Activate the plugin

Use Plugin manager to activate the Font Awesome plugin:

Pinegrow will ask you if you want to include Font Awesome CSS from CDN to the page:

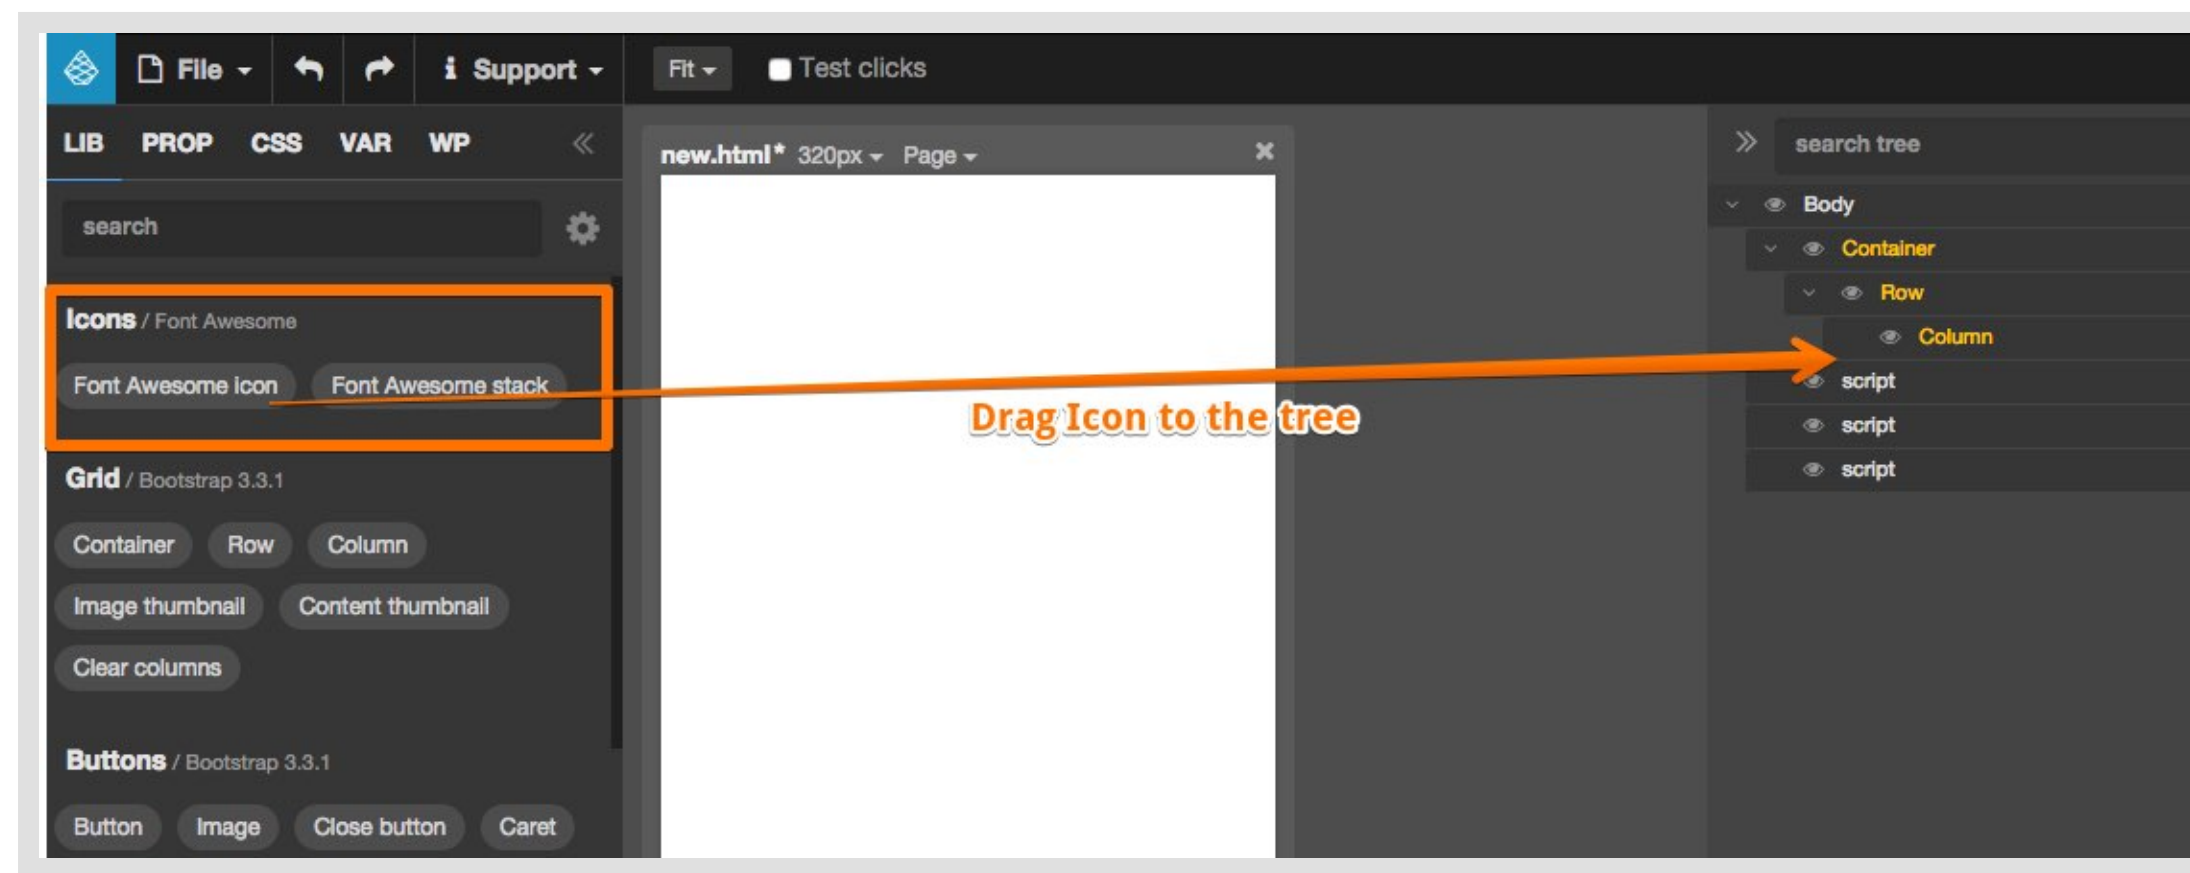

You can also add CSS manually in **File -> Manage stylesheets**.

Font Awesome components will appear in the **LIB** panel.

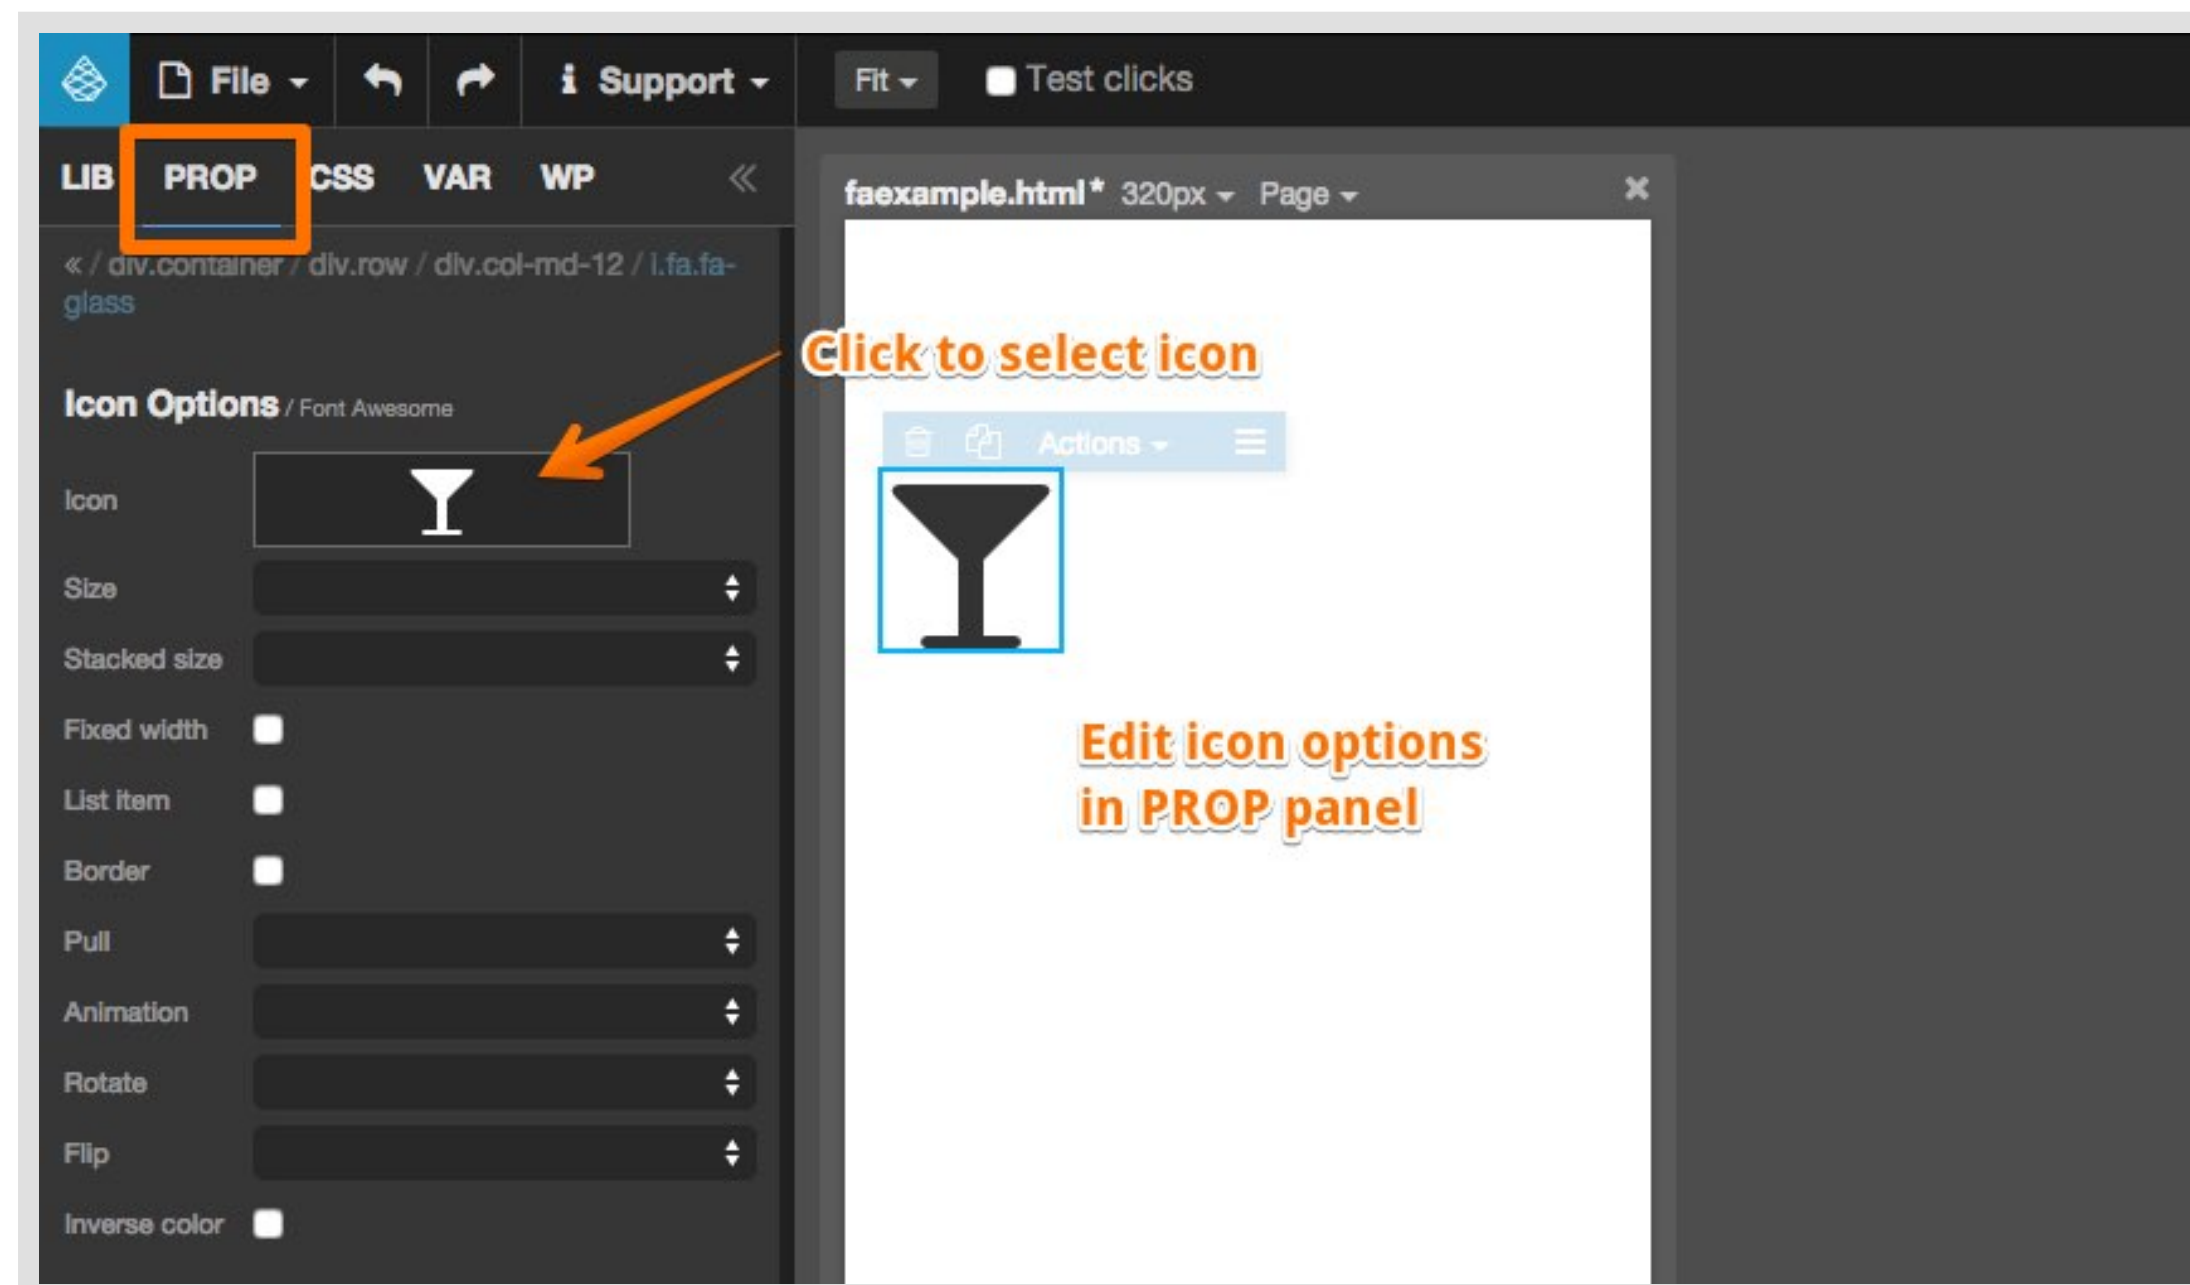

## Add icons to the page

Place **Font Awesome Icon** from the LIB panel to the page.

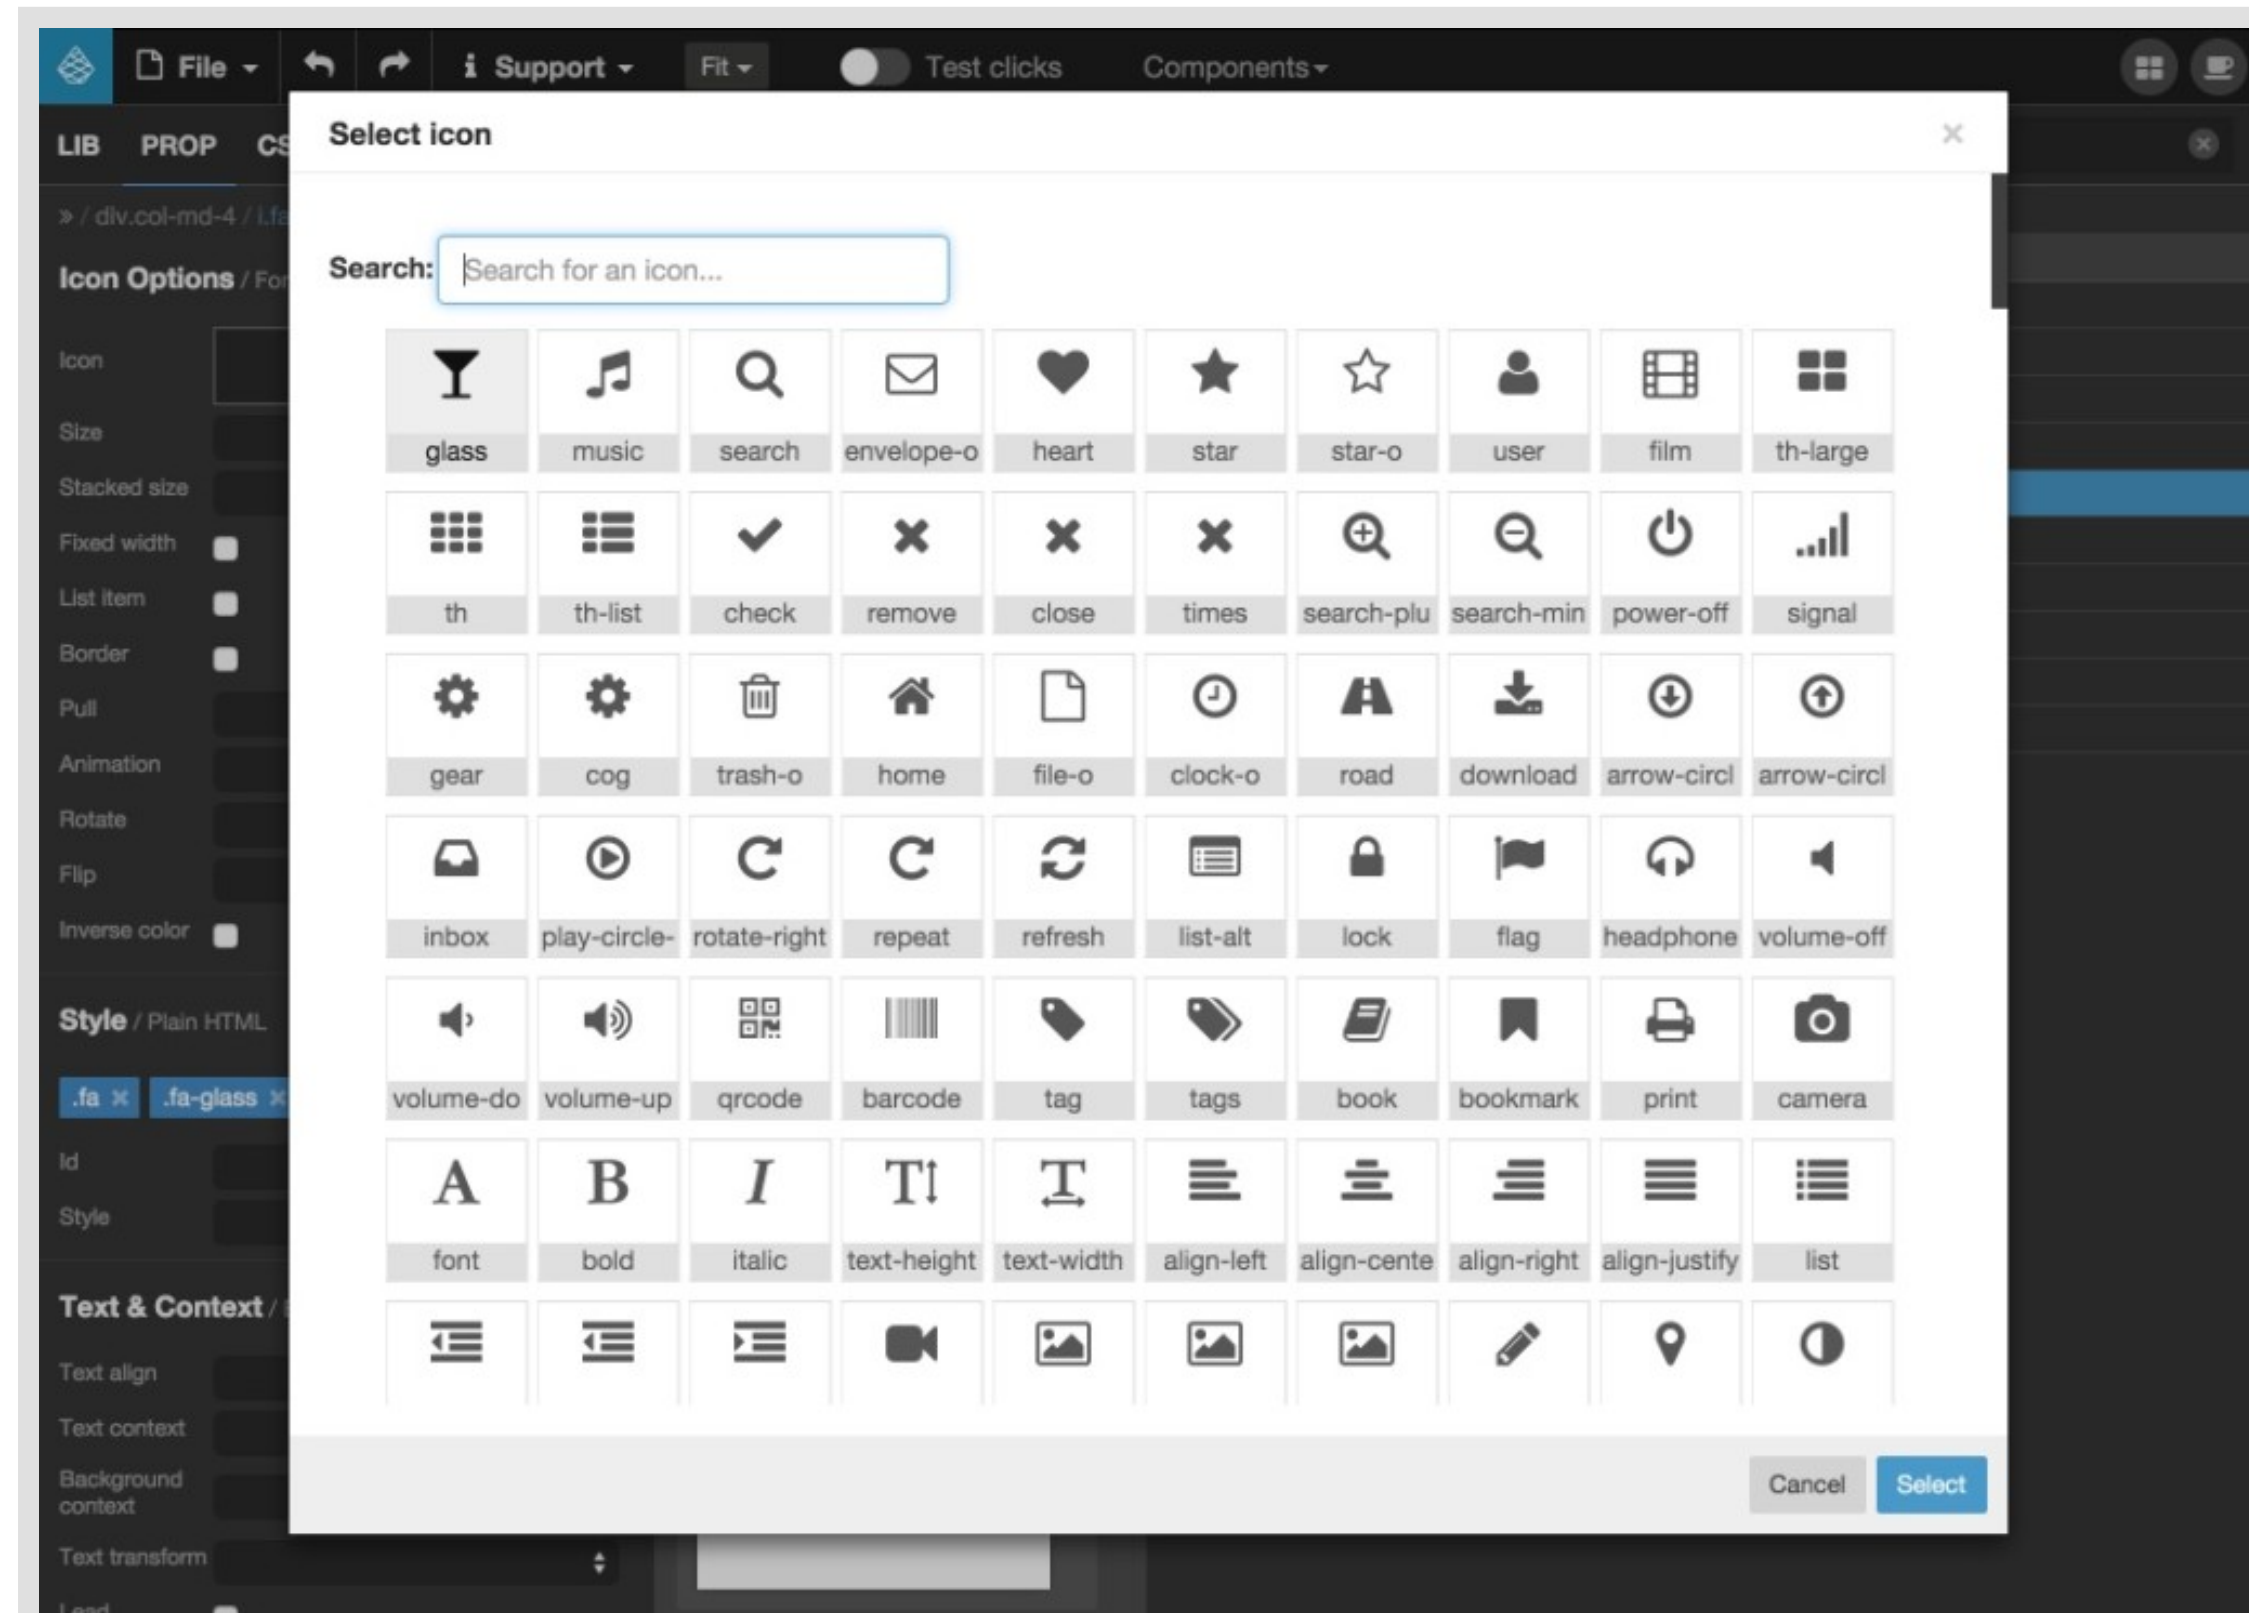

## Edit icons

Select an icon and go to **PROP** panel where you can choose the icon and edit its properties:

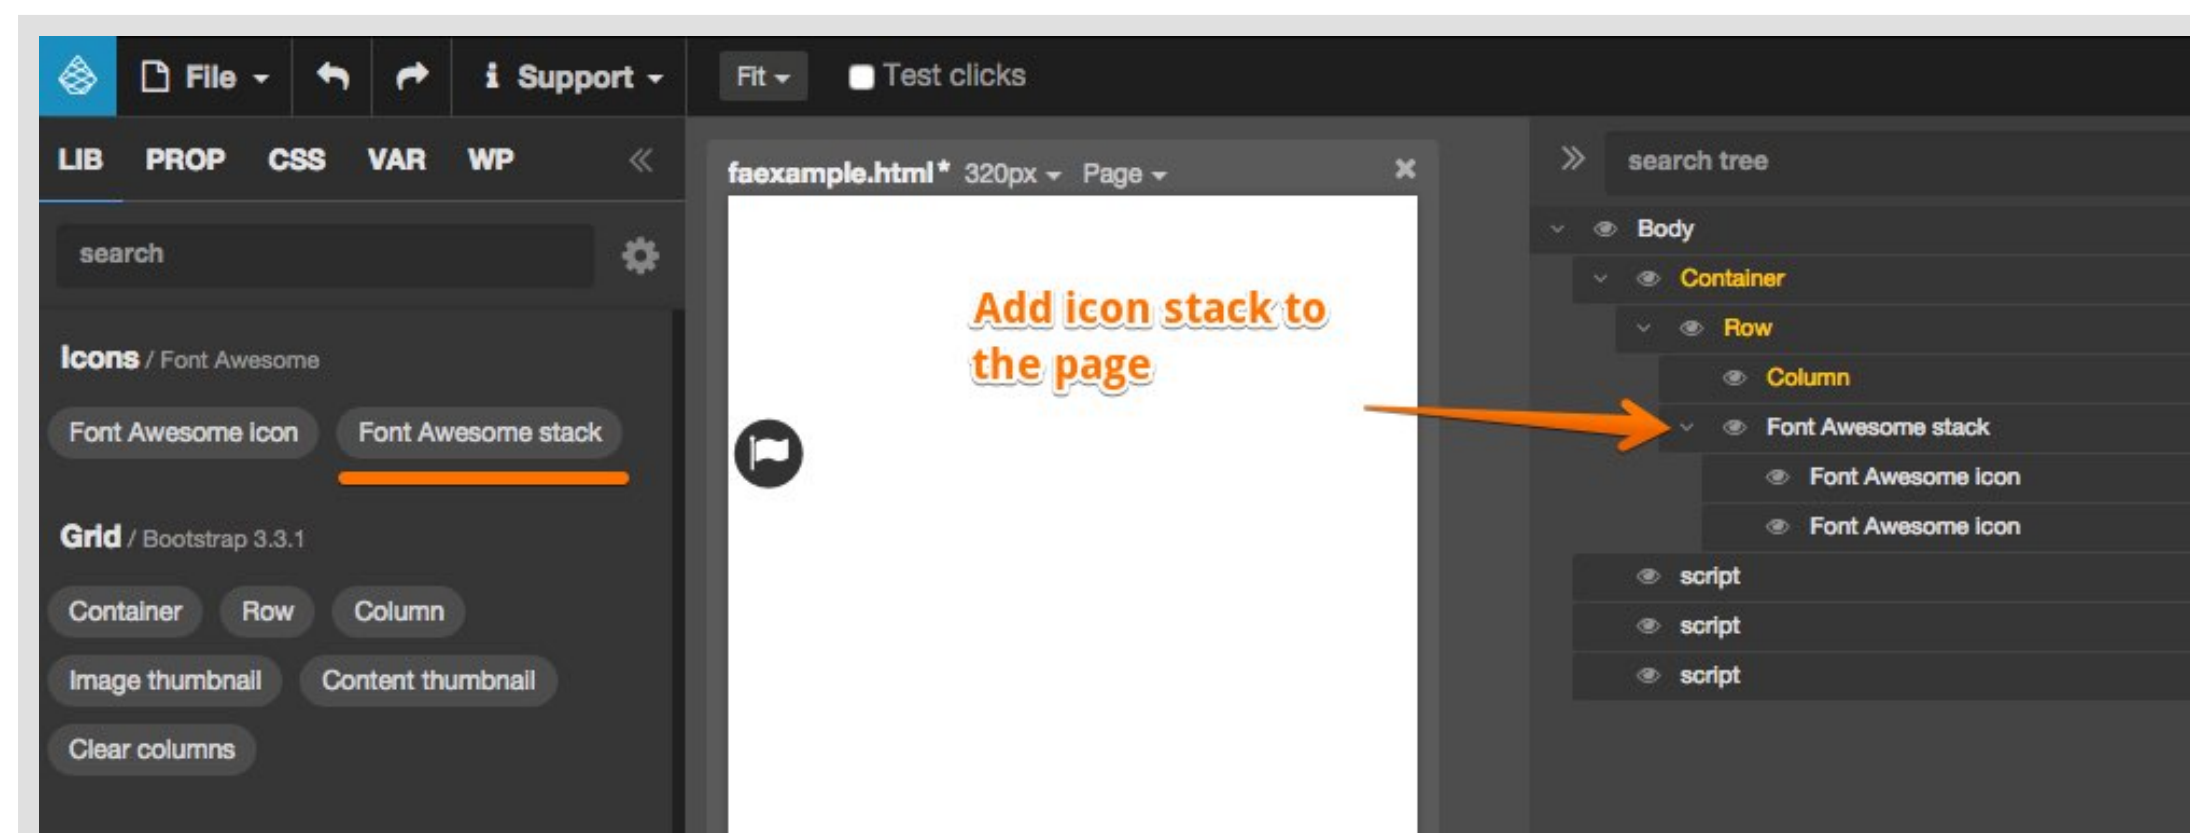

Select the icon:

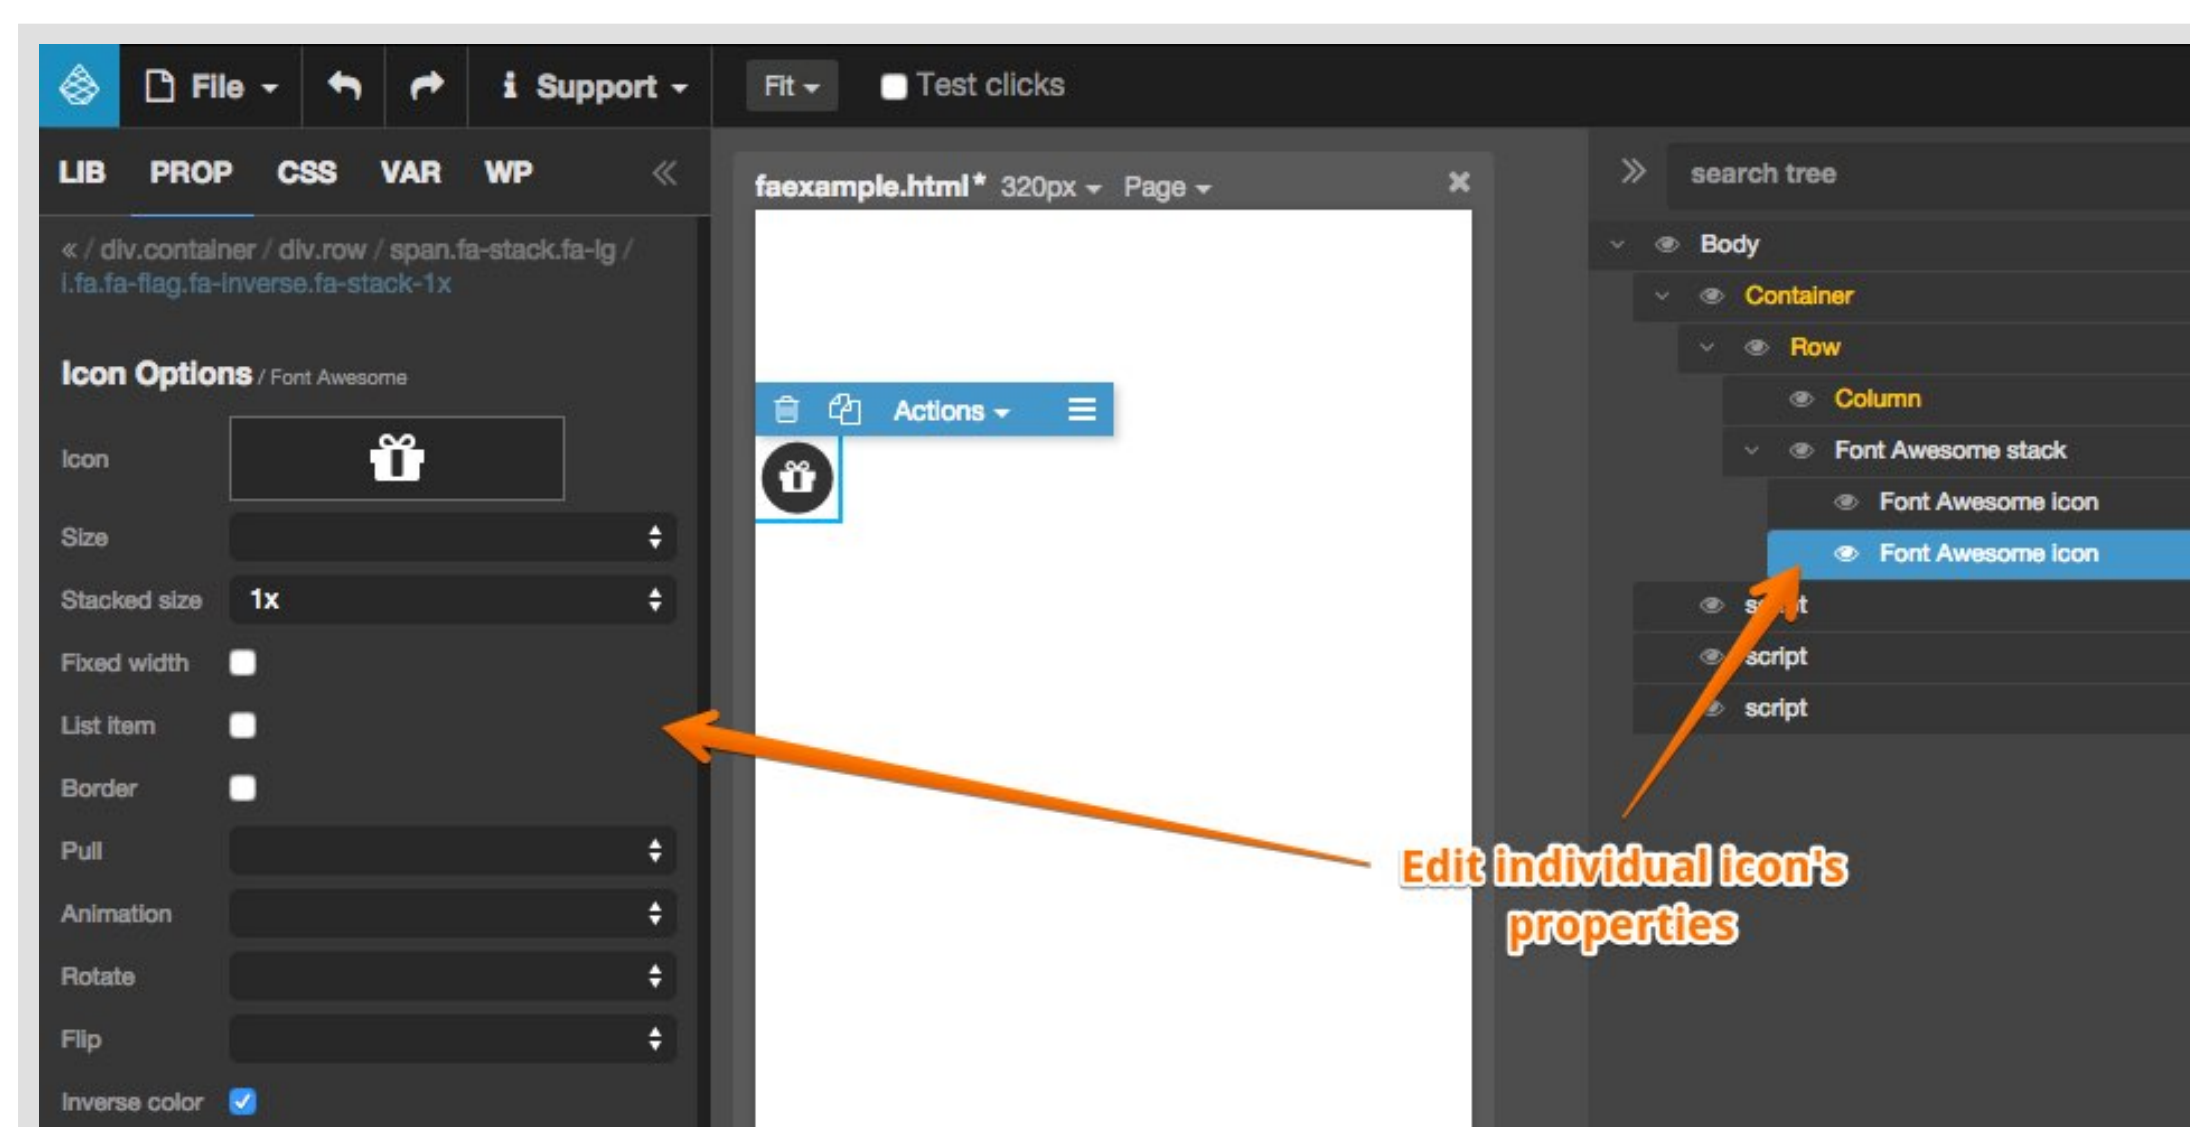

## Icon stacks

Place **Font Awesome Icon Stack** to the page to use stacked icons:

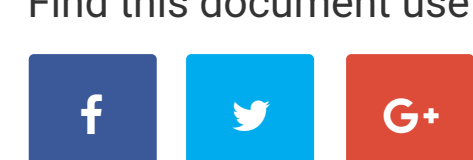

Select individual icons in the stack to edit their properties:
